PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 3+ years of experience specializing in React.js, Redux, and UI development. Proven track record in designing scalable, high-performance, and user-friendly web applications. Skilled in integrating frontend with backend systems and optimizing UI for better performance and responsiveness. Strong leadership skills in mentoring teams, managing projects, and collaborating with cross-functional teams. Passionate about clean code, component-based architecture, and enhancing user experience.

PROFESSIONAL EXPERIENCE

Frontend Developer | eArbor, Hyderabad (Jan 2022 - Present)

- Led a team of 5 developers, including 2 frontend and 2 backend engineers + 1 QA, ensuring smooth collaboration and timely project delivery.
- Designed and implemented highly interactive, scalable, and responsive UIs using React.js, Redux, and Ant Design.
- Collaborated closely with backend teams to integrate .NET APIs and optimize performance across applications.
- · Enhanced state management for seamless user interactions and efficient data handling.
- Improved page load speed by 30% using performance optimization techniques.
- Conducted code reviews, mentoring junior developers, and ensuring high coding standards.
- Worked on complex feature development, debugging, and UI/UX improvements to enhance the overall user experience.

EDUCATION

B.Tech - Civil Engineering (2016 - 2020)

Annamacharya Institute of Technology and Sciences

PROJECTS

MAI - WMS (Warehouse Management System) (Jul 2022 - Present)

Technologies: React.js, Redux, .NET, PostgreSQL

- Built a feature-rich WMS that streamlines logistics and improves warehouse efficiency.
- Implemented real-time stock tracking, batch and lot tracking, automated inventory updates, and predictive analytics for optimized stock replenishment.
- Developed a scalable, responsive UI with Ant Design and Tailwind CSS.

BOLX - WMS (Dec 2022 - Present)

Technologies: React.js, Redux, .NET, PostgreSQL

- Created an automation-driven WMS enhancing workflow efficiency, inventory management, and order fulfillment.
- Integrated real-time analytics and ERP system syncing for seamless business operations.
- Designed a modern, user-friendly interface optimizing warehouse task execution.

SBBS - Printer Rental Services (Jan 2024 - Present)

Technologies: React.js, Redux, .NET, PostgreSQL

- Developed a customizable rental platform enabling flexible printer rental services.
- Implemented secure payment integrations, real-time data reporting, and automated maintenance scheduling.
- Enhanced customer experience with a self-service portal and interactive UI.

ROLES & RESPONSIBILITIES

- **Team Leadership:** Led a 5-member team, ensuring project goals, quality standards, and technical quidance.
- Frontend Development: Built scalable, reusable React components following best practices.
- State Management: Leveraged Redux for efficient data handling and application performance.
- UI/UX Optimization: Designed high-performance, mobile-friendly, and intuitive user interfaces.
- Backend Collaboration: Worked closely with .NET teams to ensure smooth API integration.
- Performance Tuning: Optimized page load times, reduced re-renders, and improved data-fetching strategies.
- Mentorship & Code Reviews: Guided junior developers, conducted code reviews, and enforced best coding practices.
- Continuous Improvement: Researched and implemented new tools, frameworks, and performance optimizations.

TECHNICAL SKILLS

Frontend Development:

• HTML5, CSS3, JavaScript, React.js, Redux, jQuery, Ant Design, Tailwind CSS, Bootstrap

Backend & APIs:

.NET, REST APIs, PostgreSQL

Tools & Workflow:

• Git, Webpack, CI/CD, Performance Profiling, Agile Methodologies

HOBBIES & INTERESTS

- Continuous Learning & Exploring New Technologies
- Creating Seamless User Experiences & Understanding User Behavior
